

The Town of St. Stephen has received many questions regarding whether Halloween will be proceeding this year. The current position on Halloween is:

1. Halloween is a community event that is not controlled, authorized or regulated by the Town of St. Stephen.

2. The Town requests citizens who choose to participate in Halloween activities to do so in a safe and responsible manner, including following any directives issued by the Chief Medical Officer and/or Department of Public Health.

3. The Town will share any information received from the Chief Medical Officer and/or Department of Public Health on our website and through social media.

Have fun but remember to always be safe and follow protocols in place to ensure that New Brunswick continues to be one of the best places to live!
