

YELLOW PHASE - <https://www2.gnb.ca/content/gnb/en/corporate/promo/covid-19/recovery.html>

Reopening of more businesses and activities after the ability to control transmission has been demonstrated. COVID-19 is controlled, still a risk of community transmission.

Risk Assessment:

- Sporadic travel-related cases and isolated outbreaks are occurring.
- Individual cases and outbreaks can be controlled through testing, tracing and self-isolation.

Subject to the [Public Health](#) and [WorkSafeNB](#) COVID-19 general guidance, the following activities are allowed:

- People can reconnect in-person with close friends and extended family. Should limit groups and follow public health guidance.
- Keep uncontrolled indoor or outdoor gatherings with physical distancing at 50 people or fewer.
- Occupancy limits in controlled indoor and outdoor settings should remain at a level which allow for physical distancing. Record keeping for participants is required to facilitate contact tracing.
- Community face masks remain mandatory in public spaces when physical distancing is not possible.
- Visitor restrictions are loosened in vulnerable settings with the use of personal protective equipment.
- All types of businesses and activities are allowed to operate under a COVID-19 operational plan. Record keeping for seated venues is a requirement.
- All educational and camp facilities are open under appropriate public health guidance, virtual to be used for at-risk groups.
- Eliminate self-isolation requirement for asymptomatic visitors if COVID-19 is under control in neighbouring jurisdictions.

Occupancy of any facility must be based on the ability to maintain physical distancing between people that are not close friends and family.

Controlled venues at which seating is offered for the purposes of eating, drinking, socialization, celebration, ceremony or entertainment are required to maintain a record of the names and contact information of all persons who

attend. The same applies to anyone who hosts, organizes or permits gatherings larger than 50. Keep information in a secure place and not in the public view. More information can be found in [*Collection of names and contact information under the Mandatory Order COVID-19.*](#)

This will enable Public Health to conduct targeted contact tracing in an expeditious manner should there be a COVID-19 case associated with the facility.
